

### 5) Chip & Charge Return Progression:

This tip discusses the proper way to execute a chip & charge return of serve.

Many players try to move in and take the ball early on this return but they forget to calculate how much power their forward momentum will give them.

**Part 1:** Returner bumps (stops) the ball up in the air just a few feet ahead of where they are standing.

**Part 2:** The player does the same as part one, but now after the ball bounces they hit an approach shot and go to the net.

**Part 3:** The player now just executes a chip & charge return.

**Part 2:** The executes a chip and charge return and follows it to the net for one more shot (volley)
