

Game 2) **Close Out Sets:**

Players play out singles points with the rule that when either player reaches **game point**, they must convert that point or they lose all their points in that game and go back to love (0).

This creates a lot of pressure and that is a good thing in a practice setting.

Note that as the score gets altered, the server should serve in to the correct box based on what the score is. This may include serving to the same service box for 2 points in a row.

Variation: The coach may choose to have each game start at 15-all or 30-all so the players get to the pressure points even sooner.
