

1 P

#### 24) Solo Server:

This is a good skill to have players work on.

Level: 3.0 & Higher

The player has only 1 serve and he has to hit only first serves (fast).

The player plays an imaginary game where he simply serves to alternating service boxes. Each time he gets his serve in, he wins the point and each time he misses his serve he loses the point.

This is a very interesting game that adds pressure to the server as they play.

To add even more pressure, have players take turns playing their game in front of the rest of the class.

The pro must remind the player that he has to hit **only first serves** and he has no second serve chances in this drill.
