

SERVING DRILL

C

3) Clear the Table:

Level: Advanced

This is a good serving game to be used with **advanced** players only.

Set up an 8-foot table on its side just behind the service line so it acts as a short wall.

Players serve one at a time and try to serve the ball hard enough to make it ricochet off the table and back across the net.

Every time a player does this, he scores a point for his team and the courts compete against each other.

This game creates pressure as others are watching you serve and you are scoring not just for yourself, but for a team.

Variation: If the player gets the ball to ricochet back **and** he can volley it into the court before it bounces, he scores an additional point for his team.

Note: Adjust the table legs to create the proper angle for the table.
