

# SERVING DRILL

## 7) Two Minute Private:

Level: All Levels

This serve practice concept allows for each player to visit the coach that is parked on the side and receive a two-minute private lesson on their serve.

All players will serve at once, but only the one next to the coach is getting the private lesson.

The coach should try to give **just one tip** to each player to work on.

If the player has great form and needs no technical adjustments just move them on and their private may only be for one minute.

This way each player gets at least one specific piece of advice before they leave for the day.

This has always been the most requested type of service practice from our players.

**Variation:** Do a 2-minute private for the Returners.
